Stop-Arm Cameras

# Catch Violations Every Time

A good video system starts with high-quality, rugged cameras that can stand up to the harsh daily movements of school buses, while still delivering crisp, high-resolution video.

Our SAC system was developed to reduce stop-arm violations, by creating an actionable video and photo record of every incident.

Don't miss a detail, with HD 1080p resolution. See the smallest details, while optimizing file size

Violation reports provide critical data and images for a fast, actionable incident-reporting program

Day or night recording, for capturing license plates in the dark (1 lux), even on vehicles traveling 75mph/100ft away

Built rugged, with an all-metal enclosure to handle whatever you throw at it

Smart Detection feature helps reduce false flags by differentiating between vehicles and other objects such as pedestrians
